Education

Graduated **high school** in 2019, with **17326/2000** mark.

Entered the Department of Informatics and Telecommunications of the **University of Athens** in 2019, estimated **graduation is in February 2026**.

Experience

Interned at Helvia (<https://helvia.ai/>) **3 months** full time, used Docker and communicated **in-person** as much as possible.

Learned some full stack by designing and making a **letter-by-letter messenger** web app. (<https://theodoros-d-alenas.site/key-mouth/>)

Designed and hosted a **static** portfolio site with the goal to have the **fewest build steps**.

Technical skills

I'm best at: Linux, C, CSS, Bash, CSS, accessibility, user testing.

I'm familiar with: Java, Typescript, ReactJS, LaTeX, algorithms and patterns.

I've used a few times: Docker, MongoDB, SQL, Haskell, Scheme Lisp, Prolog.

Soft skills

I enjoy **face to face** communication and I collaborate better with **casual people**.

I've been in **5-10 teams** for team projects, usually **we all worked** but that added challenge.

I **question** my coding style, my UI designs and my understanding of assignments through direct **feedback** from teammates, user tests and the professor respectively.

Hobbies

Piano until 2021, illustration until 2022, Linux until 2023 though I still use Linux.

Maybe I should continue one day.
